

Step 01

Understanding Spaces

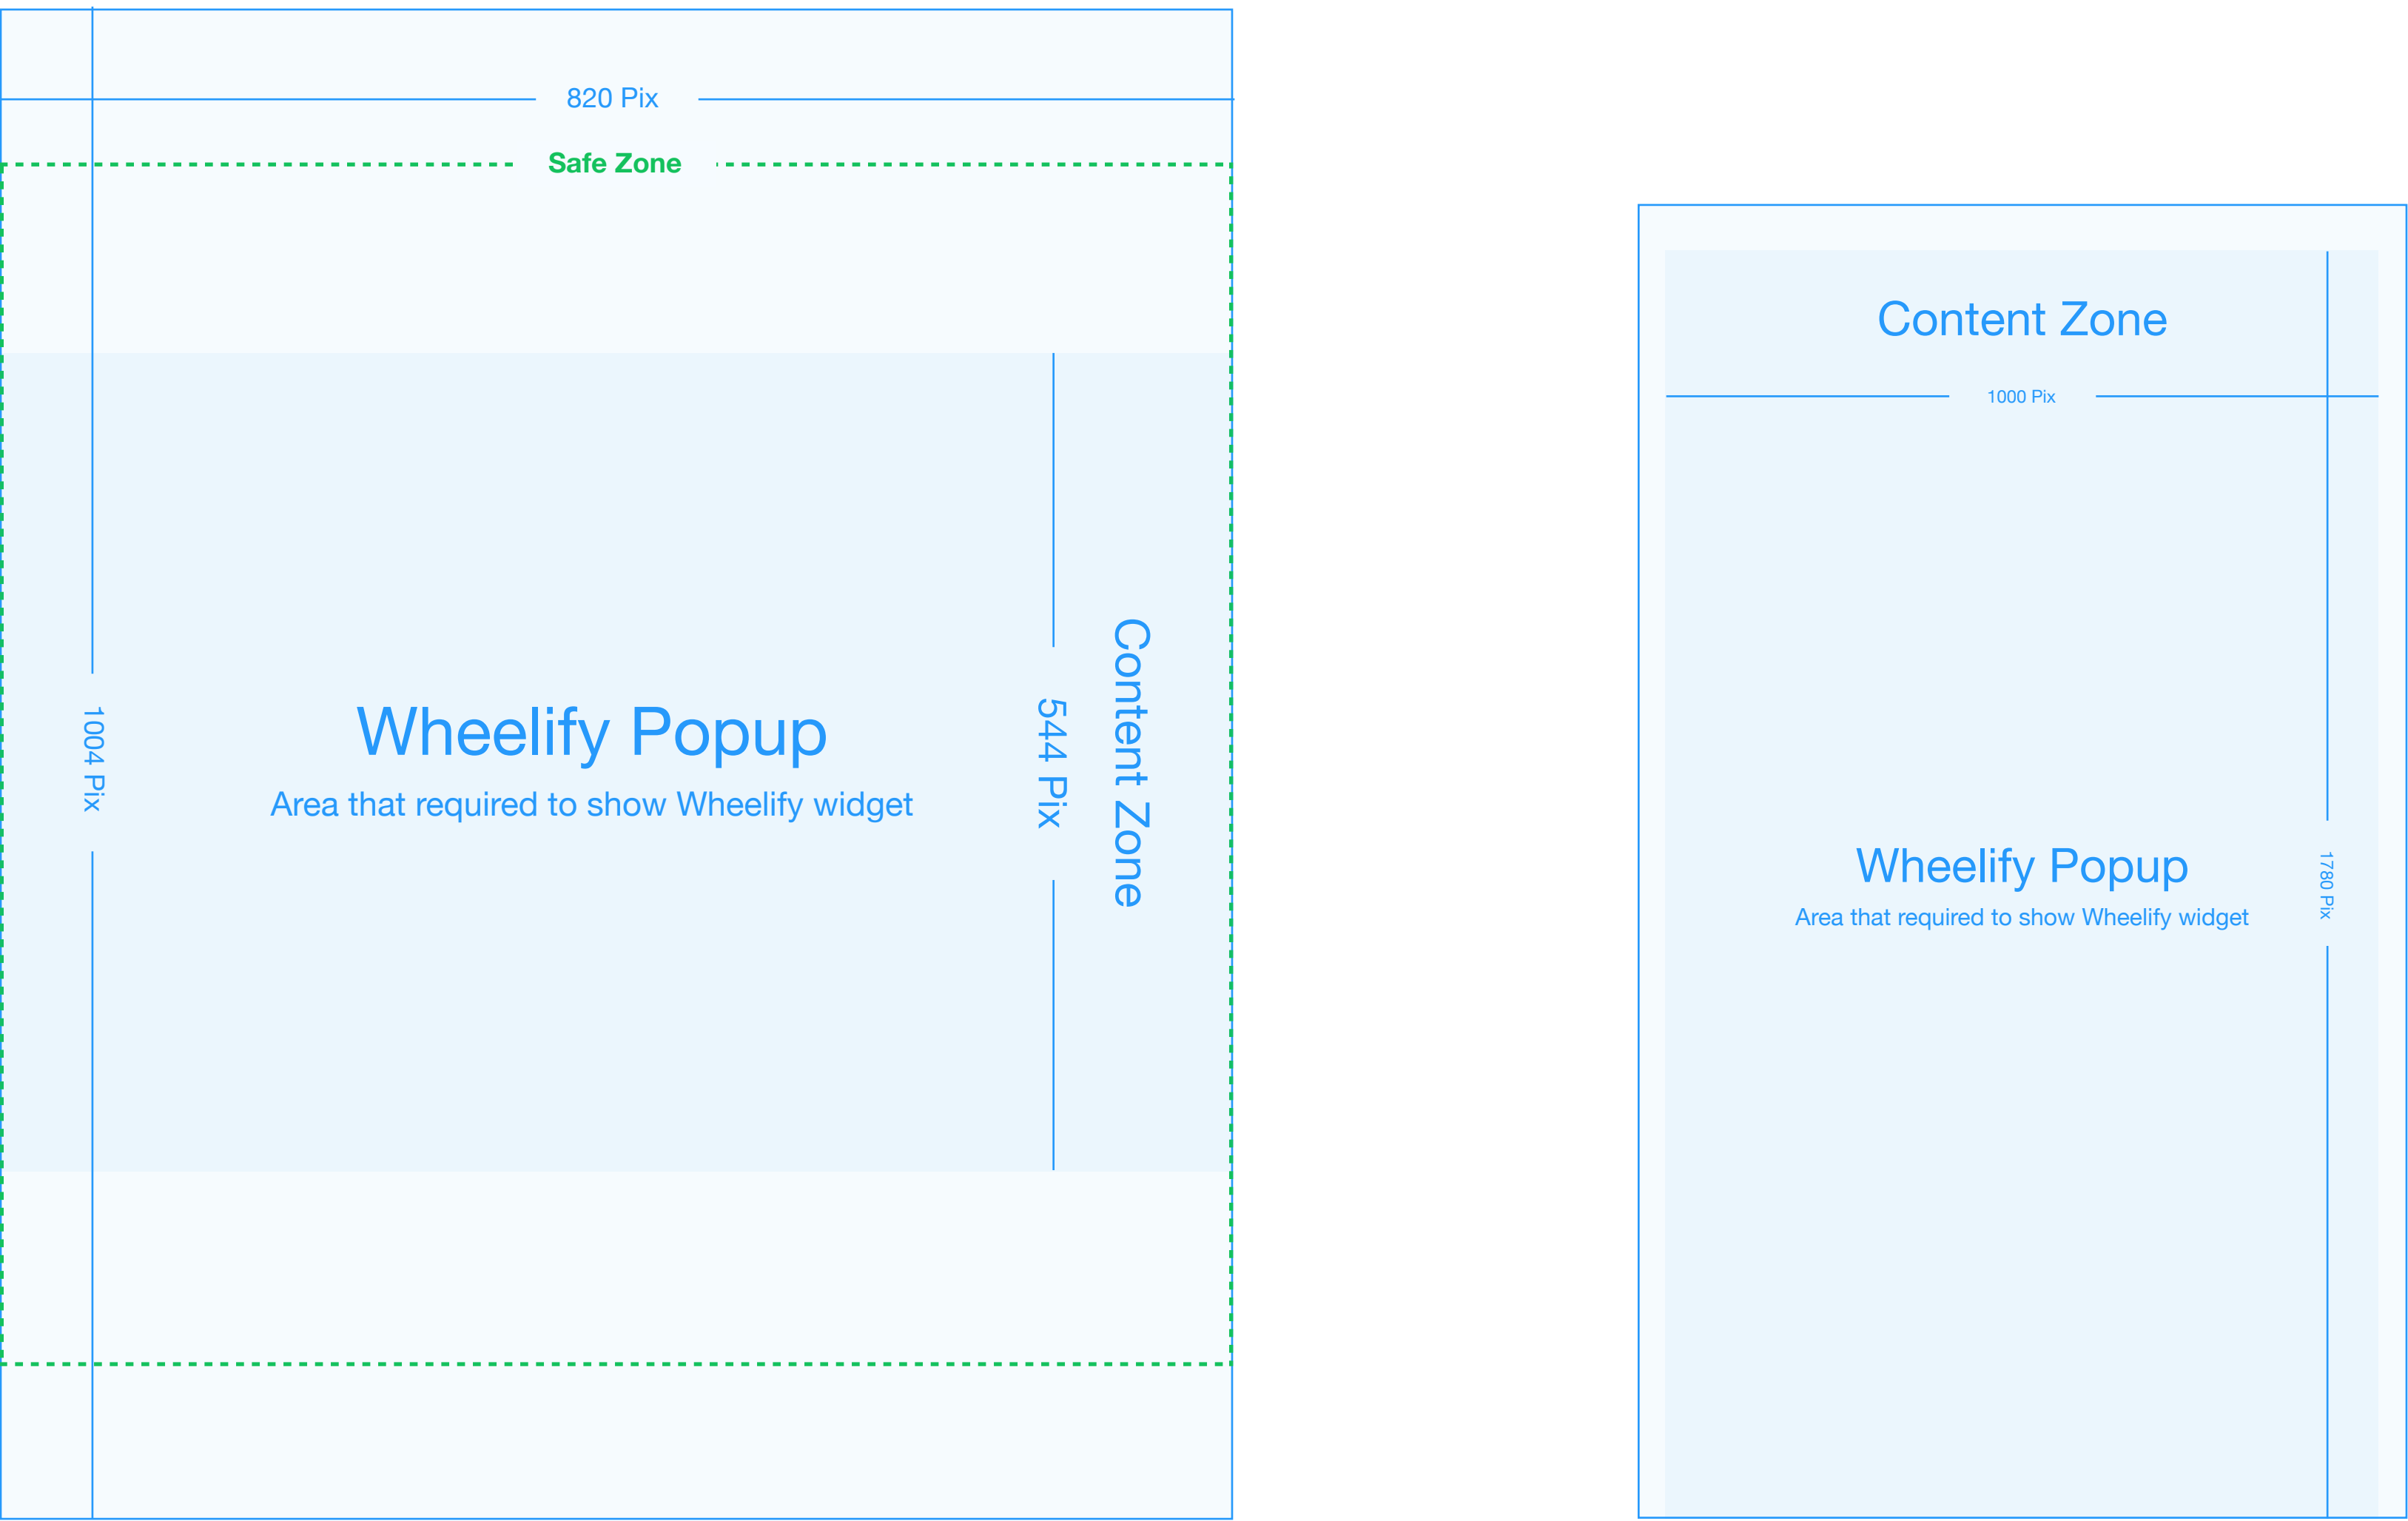

How much space is used Wheelify widget in Desktop and Mobile Browsers

Step 02

How to Prepare Backgrounds?

Specifications for preparing backgrounds for Desktop and Mobile usage.

Desktop

The content zone is the area required and consumed by “Wheel and Form” so your artwork won’t be visible much behind this area. Above and Below parts are visible for background which may or may not get bleed-out/cropped as per different screen resolutions.

You’re suggested to follow the Safe Zone to setup your artwork on background.

Areas:	
Actual Size:	Width: 820Px X Height: 1004Px
Content Zone:	Width: 820Px X Height: 544 Px
Safe Zone:	Width: 820Px X Height: 800Px

Mobile

The content zone is the area required and consumed by “Wheel and Form” so your artwork won’t be visible much behind this area. Above and Below parts are visible for background which may or may not get bleed-out/cropped as per different screen resolutions.

You’re suggested to follow the “Actual Size” to setup your artwork on background.

Areas:	
Actual Size:	Width: 1080Px X Height: 1844Px
Content Zone:	Width: 1000Px X Height: 1780Px
Safe Zone:	Width: 1080Px X Height: 1844Px

Step 03

Uploading a custom background theme to Your Wheelify Campaign

If you don’t have a URL and would like to generate one, follow these instructions:

- 1 - Go to your Shopify Files Menu: <https://www.shopify.com/admin/settings/files>
- 2 - Click “Upload files” and select your images.
- 3 - Once the upload is complete, Shopify will display its URL.
- 4 - Copy the URL and paste it into your campaign’s themes page.

Step 04

Where to Place the Links?

To add your custom background theme to any campaign;  
Go to Themes page in a campaign and enter the image URLs of your custom themes for desktop and mobile separately. (Below screenshot will be replaced by original Wheelify’s screenshot)

Logo URL

Full URL, png/jpg image

Max width 400px

Subject

Order #[order\_number], please review your latest purchase

Use {name} or {last\_name} as a placeholder for the user's first or last name  
Use {order\_number} for the order number
